

 **TrueCONNECT™ Express**

Speedy Provision Private Network with IPsec Encryption

TrueCONNECT™ Express is a network-based private network service that offers secure connection between multiple client sites over existing Internet connections and CITIC Telecom CPC MPLS backbone at an affordable price.

With **TrueCONNECT™ Express**, you can enjoy the benefits of high-performance, secure private network as well as the flexibility, scalability, redundancy and lower costs offered by local Internet access, as an alternative to dedicated local leased connections. It is a carrier grade backbone to enhance business communications efficiency, which in turn helps you create new business opportunities in today's competitive markets.

- World-class Connectivity Solution
- Fully Meshed Topology
- Secure
- Reliable, Resilient and High Quality
- Optimization of Resources and Cost-Effective
- Utilization of existing Internet connection for speedy provision
- Network security with IPsec encryption
- Scalable
- 24 x 7 Customer Services Hotline Support
- Service Management Portal - *ManagedCONNECT*

> **Global-Local Intelligent DICT Service Partner**

Cost Effective

With managed private network services, you can optimize the network for different business applications, such as email, Intranet, Extranet and ERP. TrueCONNECT™ Express is an ideal and cost-effective solution with high flexibility to be customized in order to accommodate your business needs. You will realize savings because of faster network configuration and better client management.

Centralized Management

Riding on TrueCONNECT™ Express, corporate software and IT infrastructure can be shared among regional operations. This centralized platform helps corporations to better manage IT resource as well as reduce investment for technical support in remote branches.

Network Security with IPSec Encryption

Network security is maintained by employing Internet Protocol Security (IPSec) standard. IPSec supports authentication and encryption to ensure secure transmission of data.

Easy to Manage

Customer site status, traffic monitoring & network performance via ManagedCONNECT service portal.

Scalability for Site Expansion

TrueCONNECT™ Express is a network-based solution and it is easy to add new sites as well as extra bandwidth to meet different customer requirements.

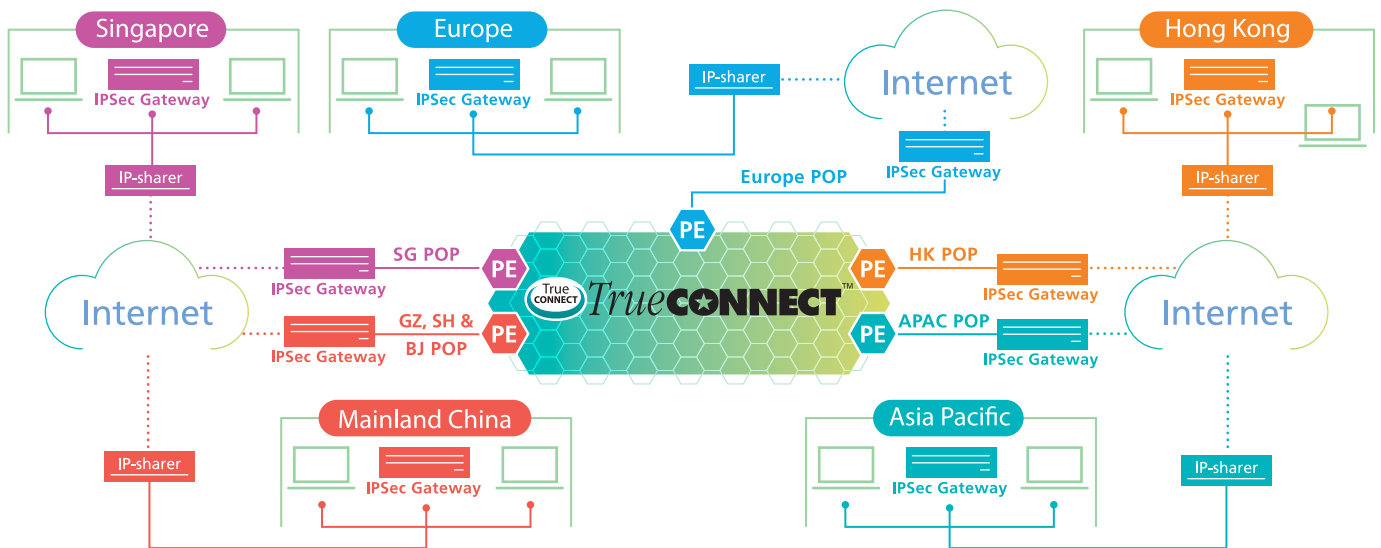

Instant and Fully Meshed Connectivity

Fully meshed connectivity is achieved among different sites connecting to TrueCONNECT™ Express service, with each node utilizing only one single private network tunnel.

Around-the-clock Support

CITIC Telecom CPC provides 24 × 7 professional network monitoring system support. Telephone and email support are available for fault reporting and technical assistance.

TrueCONNECT™ Express Network Diagram

Who Should Use

- Companies with multiple offices across regions, such as Mainland China, Hong Kong, Singapore; UK & Europe regions
- Companies which would like to build up close and flexible network communications between offices
- Companies without an existing WAN network, but with many remote sites that require a meshed network
- Companies which value security, cost-effective and efficient operations
