

SmartCLOUD™ Compute
**Virtual Private
Cloud Solution**

High-Performance Cloud Resources At Your Total Command

Time-to-market and high strategic agility are key success factors in today's fast-paced business environment. With rapid development in the IT sector over the last few years, cloud computing has become essential when considering new business opportunities and technology possibilities - a way to increase capacity, or add capabilities on the fly, without investing in new infrastructure, training new personnel, or licensing new software.

CITIC Telecom CPC's SmartCLOUD™ Compute, a revolutionary virtual private cloud solution with flexible subscription models, that goes beyond ordinary offerings to extend your existing IT capabilities and dynamically boost your business efficiency competitiveness and agility.

HIGHLIGHTS

- The top scale of cloud platform within the market, supported by VMware
- Fully compatible with various cloud backup, Disaster Recovery (DR) and security solutions
- High flexibility of computing resource allocation bases on the abundant resource pool
- Centralized cloud management portal with 2-factor authentication
- Support dedicated server, storage option and network connections to other public cloud providers
- Full suite of managed services, including assessment of enterprise IT landscape, monitoring, pre-service and on-going support

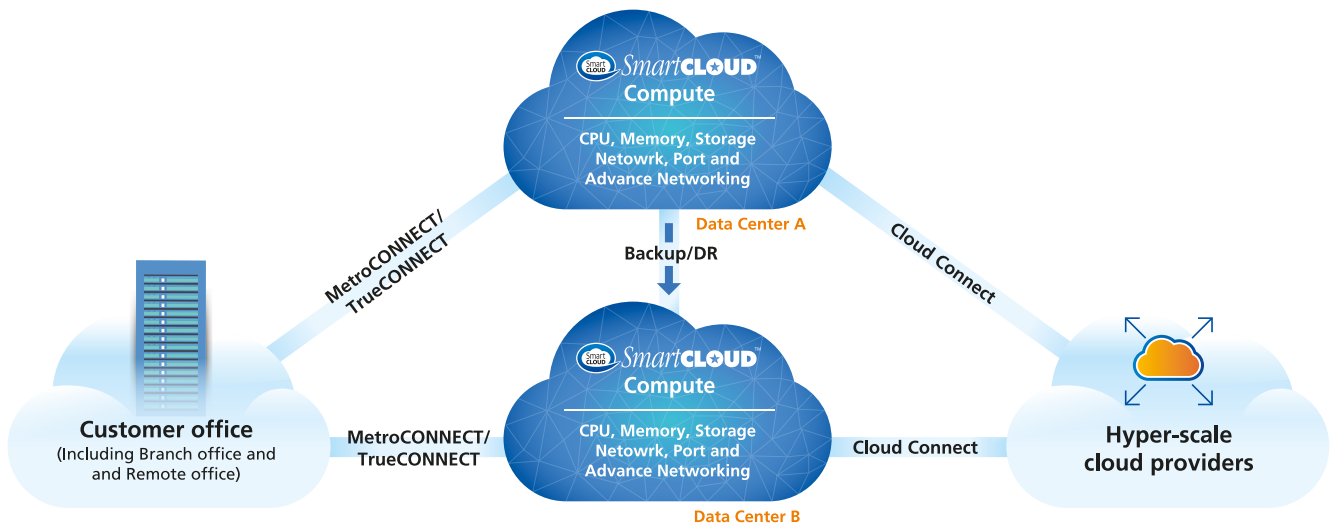

> **Global-Local Intelligent DICT Service Partner**

High Availability (HA) with True Disaster Recovery (DR) Safeguards

BUILD YOUR BUSINESS WITH CONFIDENCE. CITIC Telecom CPC SmartCLOUD™ cloud computing solutions which can complement the company’s managed private network and managed security solutions.

SmartCLOUD™ Compute offers robust high availability and true disaster recovery that gives you perfect peace-of-mind. Automated in-site failover (across even disparate hardware) can instantly backup and restore service, network assets and storage access, minimizing business operation disruption. Even in a hybrid environment, business can enjoy the load balancing and high availability features of the backup and DR services.

To ensure data localization and compliance requirements across regions, CITIC Telecom CPC ‘s Multi-Cloud Connect service provides a total managed interconnectivity solution that ensures reliable and secure connection to different China and global cloud platforms, including AWS, Azure, Google Cloud etc, for supporting your global digital business.

Flexible choices of STORAGE:

Storage SSD

- Ultra-high performance, low latency all-flash array
- Optimized performance storage resources designed for the IOPS sensitive applications, such as database, ERP and trading system
- To cater different applications environments, IOPs can be dynamically allocated to different VMs.
For example, within the subscribed Storage SSD resource pool
- Additional IOPs can be added to Storage SSD for enterprises that require for small SSD storage capacity with high IOPs performance.

VM	9,000 IOPs consumed
VM	5,000 IOPs consumed
VM	5,000 IOPs consumed

Up to 19,000 IOPs & 300 Mbps throughput can be shared among VMs.

Storage Hybrid

- Cost-effective mixed disk array running on hard disks with SSD cache
- Designed for a wide variety of resources loading
